## Лабораторная работа №3

---

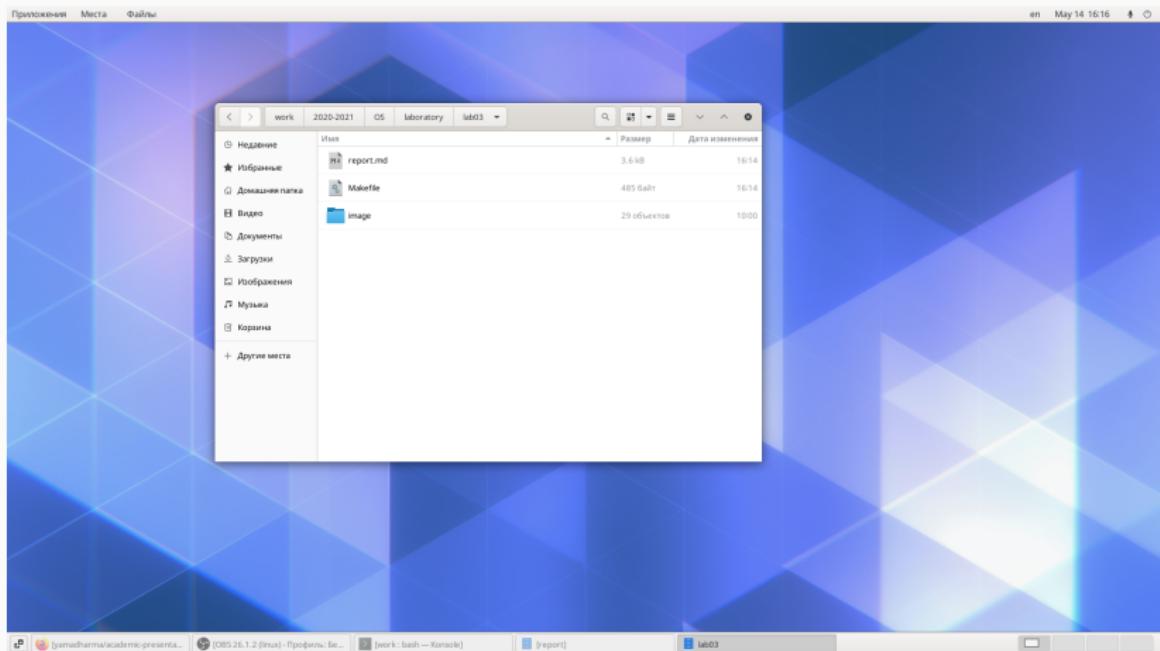

# Ход работы

Я скопировал репозитории с шаблонами отчёта и презентации.

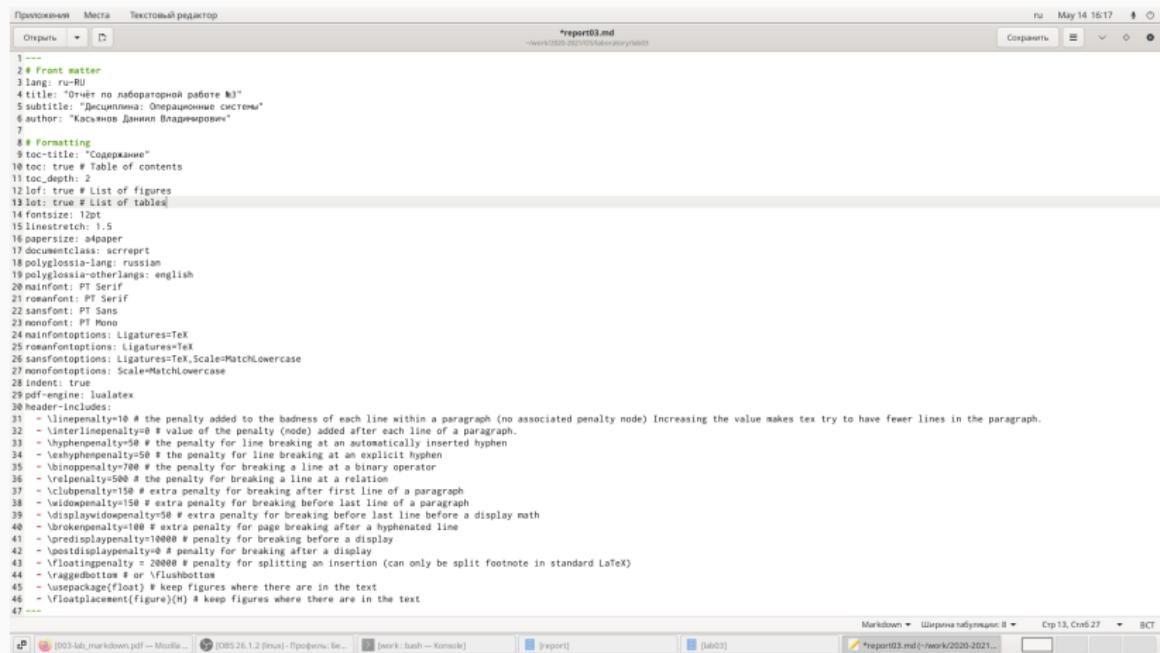

Клонирование репозиториев

В рабочей директории создал папку image03 с пронумерованными для удобства скриншотами; переместил в рабочую директорию шаблон лабораторной работы в формате Markdown и Makefile.

Создание папки по шаблону

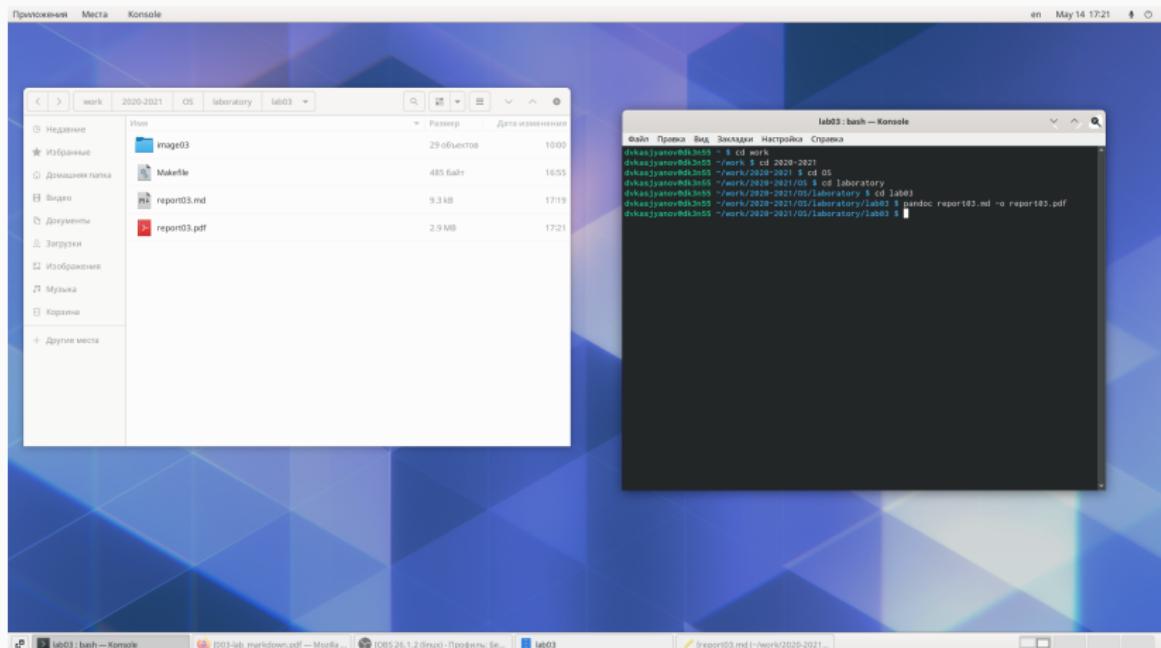

С помощью текстового редактора оформил титульный лист, скопировал текст из оформленного отчёта и вставил в шаблон. Исправил все ошибки, появившиеся в процессе копирования.

31 - \lmpenalty=10 # the penalty added to the badness of each line within a paragraph (no associated penalty node) Increasing the value makes tex try to have fewer lines in the paragraph.
32 - \vbadness=10000 # the penalty for a line breaking after each line of a paragraph.
33 - \vbadpenalty=100 # the penalty for line breaking at an automatically inserted hyphen
34 - \vshyphpenalty=50 # the penalty for line breaking at an explicit hyphen
35 - \binoppenalty=100 # the penalty for breaking a line at a binary operator
36 - \relpenalty=500 # the penalty for breaking a line at a relation
37 - \clubpenalty=150 # extra penalty for breaking after first line of a paragraph
38 - \widowpenalty=150 # extra penalty for breaking before last line of a paragraph
39 - \displaywidowpenalty=90 # extra penalty for breaking before last line before a display math
40 - \breakpenalty=10000 # extra penalty for breaking a line at a hyphenated line
41 - \predisplaypenalty=100 # penalty for breaking before a display
42 - \postdisplaypenalty=3 # penalty for breaking after a display
43 - \floatingpenalty = 20000 # penalty for splitting an insertion (can only be split footnote in standard LaTeX)
44 - \raggedbottom or \flushbottom
45 - \usepackage{float} # keep figures where there are in the text
46 - \floatplacement{figure}{H} # keep figures where there are in the text
47 --
```

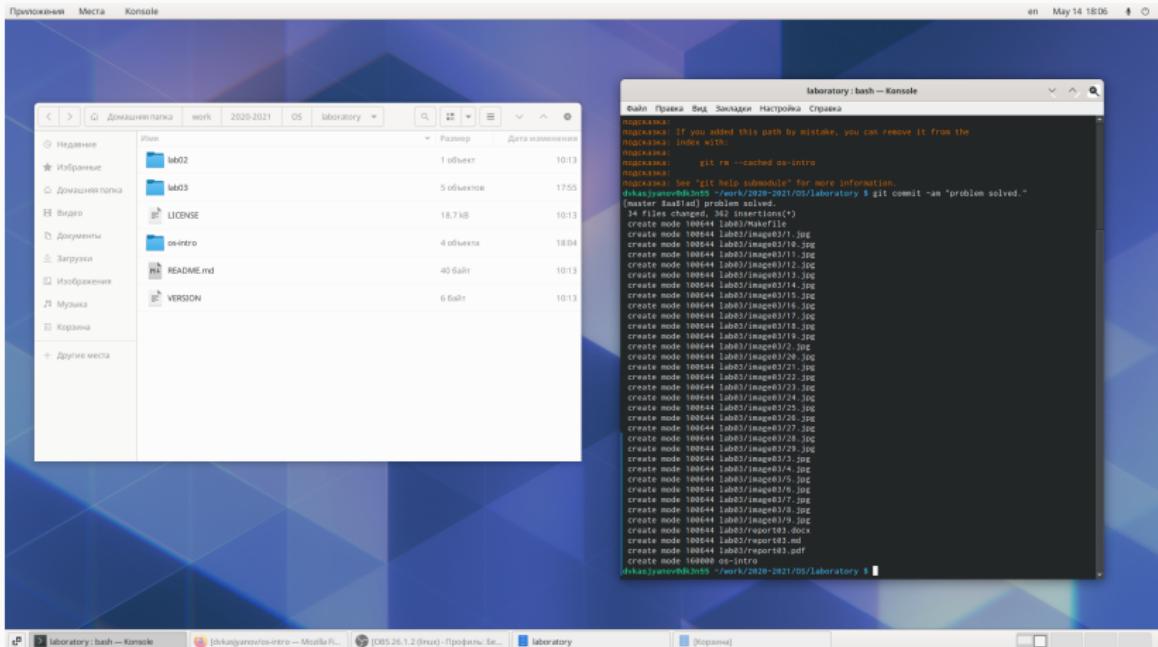

## Оформление отчёта

Используя команду pandoc README.md -o README.pdf создал отчёт в формате pdf. Аналогично для отчёта в формате docx.

Создание отчёта в формате pdf и docx

Сохраняю все локальные изменения и передаю их на репозиторий github.

Передача изменений на github

# Проверяю репозиторий

The screenshot shows a GitHub repository page for 'dvkasyanov/os-intro'. The repository has 2 branches (master, lab2) and 2 tags. The README.md file contains the text 'Лабораторные работы'. The repository has 7 commits:

Commit	Message	Time Ago
Update and rename test.md to lab02.md	problem solved.	5 days ago
problem solved.	problem solved.	2 minutes ago
my commit	my commit	8 days ago
my commit	my commit	8 days ago
first commit	chore(maint) add version	8 days ago
chore(maint) add version		8 days ago

The repository has no description, website, or topics provided. It includes a Readme and a CC-BY-4.0 license. There is one tag and no releases. No packages have been published.

## Проверка

## Выводы

Я научился оформлять отчёты с помощью легковесного языка разметки Markdown.

Спасибо за внимание!
